This is modification of the standard Joomla!1.5 Mainmenu module that uses Multicategories categories as menu items. It's intended to use with Multicategories Component for Joomla!1.5 only. Do not try to use it on your site if you have not Multicategories Component for Joomla!1.5 installed.

Multimenu Module main features:

- Multicategories Component for Joomla!1.5 categories support;
- Multicategories Component for Joomla!1.5 articles support;
- standard menu items support (Multimenu Module Extended Edition only).

Multimenu Module Version 1.0.0:

- basic functionality added.
