This is modification of the JoomFish module that places a language selection box on your website. The main difference from the original module is that this one uses styles from GTranslate module.

MilkJoomFish Module main features:

- GTranslate styles support.
-

MilkJoomFish Module Changelog Version 1.0.2:

- all original template files was totally rewritten;
- new parameter "Module Align" was added.

MilkJoomFish Module Changelog Version 1.0.1:

- new parameter "Flag Size" was added.
-
