Multicategories Component for Joomla!1.6 main features:

- multcategory article support (single article can be assigned to several categories);
 - deep visual and functional integration with Joomla!1.5;
 - no core patches needed.
-

Multicategories Component for Joomla!1.6 version 1.0.0b1:

- just main functionality added.
-

Multicategories Component for Joomla!1.6 Download Section

This is just the beta version for testing purposes only. We DO NOT recommend to use it on live websites yet.
